Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16 and 17, drawn to polypeptides, classified in class 530, subclass 350, for example.
- II. Claims 18-27, 32, and 33, drawn to a gene, a transformed plant wherein expression of the gene is decreased, seed obtained from said plant, a method for the production of a transformed plant in which biosynthesis of theobromine is inhibited, by decreasing expression of said gene, classified in class 536, subclass 23.6, for example.
- III. Claims 28-31 and 34, drawn to a transformed plant wherein a gene is introduced to increase theobromine biosynthesis, seed obtained from said plant, and a method for production of said transformed plant, classified in class 800, subclass 278, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and effects. The polypeptides of Group I are not required by the genes, transformed plants, and methods of the other groups. The method of decreasing the expression of a gene and the transformed plants of Group II, and the method of increasing the expression of a gene and transformed plants of Group III are not required by each other. Decreasing expression of a gene in a plant would have a different effect from increasing the

Art Unit: 1638

expression of said gene in said plant. The methods, transgenic plants, and genes of Groups II and III do not require the polypeptides of Group I. Further, the amino acid and nucleotide sequences of all the groups can be made by alternative means, such as chemical synthesis.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
